Rating: 8\10. So much fun. Each of the spells are unexpectedly deep, well executed and distinct experiences.

Demonstrates so much promise for VR in general. A real eye opener. Just fantastic experience.. This game is awesome! It really is alot of fun and well worth the money.

I highly recommend it 10V10:D. Hey there!

So I am digging it so far, the aesthetic and the general atmosphere are good. I normally play more graphic intensive games, but I really love the effort that has been made here.

Digging into the carriages, their politics and so on has been fun. There is a lot of potential to lose yourself in micro management. I better be careful.

Also, I love the idea, the sentient fog, the dystopian survivor ideal. All things I can dig my teeth into. I would say the game is not super scary, but is great at building tension and atmosphere.

I recommend this game to anyone that likes to get into a bit of management. Stuff like screwflies earlier release Zafehouse.. My advice is to try and fit as much of this game in your mouth as possible. It's fantastic.

Let's talk a little, quickly, about the lane brawling and then I'll cover the elephant in the room. I think that lane brawling is absolutely the tightest way to cram as much information on the screen as possible. Now, onto the elephant.

Castle Crashers.

This is not Castle Crashers. There are mechanical similarities, sure. But castle crashers was ultimately a game about mashing attack while laughing. This is a game about timing, cooperation, and careful resource management. Lane brawling means that the screen is far more legible and that player interaction can be a lot deeper. The characters are much more differentiated, with hitboxing and charged abilities designed to create disjoint battlefield utility. This is a great little game. There isn't too much content, but it should keep you busy for a few hours at least. It was surprisingly very funny, and I laughed out loud on numerous occasions. If you want something a little different from what you have been playing a lot, this game foots the bill. I would buy it again!. Art installed to C:\\Program Files (x86)\\Steam\\steamapps\\common\\OutDrive\\Art. Pros:

- -Great graphics
- -Highly replayable
- -Very polished and smooth gameplay

Cons:

- -Another stationary wave defence game
- -Not a lot of content (about average for VR)
- -Trophy shelf and exit button are hard/impossible to interact with limited playspace

What the game lacks in story and exploration it does a good job of making up for with some impressive visuals and visceral action. Not to name names but it's better than most of the \$15 VR titles I've purchased so far.. Die hard SLA fans: This is a pretty awesome experience just to see the parshendi and the chasms up close in VR. The chasm fiend is just as scary in VR as I imagined in the book. I am happy I got this, even if it only takes 15 minutes to beat. I did wait till this went on sale for \$4 and I definitely think that is the best choice if you can wait. I think it is worth it just to support any dev that will developer Sanderson games, hence why I am going to recommend it.

Anyone else: Don't buy this. It is unpolished, clunky, and definitely not worth the money. There are much better VR games for the price. Go read The Way of Kings, then you will likely become a Die Hard SLA fan as I listed above. Decide then if this is worth it to you.. I loved this gamel. If you like word games, but want a bit more than just scrabble, then this could be for you. The games are fast and easy to restart if it isn't going well. It is easy enough to do well, but sometimes you have try try several times to get 3 stars, and sometimes I just settle for 2 stars:) . I liked the idea of an objective to help the characters fall to the bottom to be saved, oxygen levels replenished by blue tiles when connected a word to a character, bombs to defuse by including them in a word, and explosions from larger words. I really loved the mechanics all the way to the end.

I completely ignored the story. It is just a lot of text to read. It was plenty fun without giving me eye strain trying to reaed it all on my TV. It ran great on my Alienware Alpha Windows 10 on my 47" TV. I used an xbox 360 gamepad (with Controller Companion to enable) and it was a breeze to play.

After playing the FREE trial with 5 games. All i can say is....

Not enough players or content.

Price is to high for unfinished game.

Game needs better animations for humans and monster.

Scary? U might get some jump scares here and there but nothing to get your pants brown for. So spooky not so much...

Wel heck is there anything good at all then after giving it a thumbs up you say?

Wel the game is playable and does not contain a lot of bugs so far i have played.

The idea is good and has potential. But they need to step it up now and get animations fixed and the gameplay style a revamp. And also please do not stick to just one way to big map! even if its going to be super random in setup in the future... i mean just trees and some houses is not going to last for very long. Need more maps! Now i thumbed this game up because the devs realy do care and keep updating and working with fanbase. They just need more time and funds to get this where it needs to be. And we could perhaps get something epic in the spooky department.

But then again...early access allways is a tricky thing for both partys. Is it worth buying atm? NO. But if you can play the free trial like me or get it below 10 bucks i would say go for it and give your experience the perhaps help the game out if your into these types of games.. Good

Game

Well

Played. I have played to 100% completion (main story, challenges, unlockables, etc.) It was fun enough for me to spend 8-9 hours completing and unlocking everything but I can't recommend it for everyone. First of all, the price is pretty steep considering how quickly you can blast through the main story. (If you watch all the cutscenes and read all of the dialogue, you can finish the 14 chapters well under 2 hrs.) The combat is too shallow and the levels aren't very challenging at all.

I didn't start to run into any difficulty until after I had beat the story on normal & hard, and then got really far up on the challenges list. This was when I was about 75% complete with everything. Then the game very quickly turns into a grind fest where you have to level up your character to unlock the next challenge. By this point, your character becomes so powerful that the game very quickly becomes too easy again, and you're just grinding to level up and unlock the rest of the challenges so you can steam roll through them.

There isn't going to be much motivation for most people to unlock everything, or to even keep playing after finishing the main story. For those who are wondering about the optional R-18 patch that has to be downloaded separately, there's really not much there. There are some topless costumes and there is a bonus room where you can watch your character get put into some compromising positions with traps and enemies (nothing more explicit than dry humping).

If I could give it a sideways thumb I would, but I can't honestly give it a straight thumbs up. I would only recommend it if you see it go on sale for five bucks, or if you're a completionist who likes to unlock things. What would have made it more worthwhile is if there more R-18 content to experience after beating everything, but you really don't get rewarded much in terms of unlockables. This is so far the most logical hidden object game I've played. I guess that's why it is also fairly short (no artificial lengthening by making you perform actions that make no sense). It took me about 2 hours. I don't mind the short length as this was more fun to play, because there was no need for using the hint button all the time. There is a map that shows available actions and lets you move quickly between places, so going back and forth is no problem. The only problem with item names in hidden object scenes I noticed was "leave", which got me stumped, but the hint revealed that it was "leaf" (should have realized that, but English is my second language). That's not nearly as serious as some I've seen in other games. The story is pretty typical for this type of games and not too bad. I paid 5.11€ for the game (bought the bundle and already had the other game) and it's worth that in my opinion.
